

Innovation that Drives UPTIME

ADVANCED REMOTE DIAGNOSTICS VEHICLE HEALTH REPORTS FAULT CODE ACTION PLANS LIVE VEHICLE LOCATION TRACKING DRIVER BEHAVIOR DATA

New International[®] **LT** Series, **RH**[™] Series and LoneStar[®] models come equipped with an OnCommand[®] Connection Telematics Device.

Each factory-installed device comes with a **FREE 24-month telematics service subscription**, which includes access to OnCommand Connection Advanced Remote Diagnostics, a set of tools designed to reduce downtime and increase your profitability.

OnCommand® Connection Advantages

- Provides one dashboard to **manage your entire commercial vehicle fleet**, regardless of make or model, and is integrated with most major telematics service providers
- Rates the severity of vehicle fault codes, allowing you to determine when immediate action is needed and when repairs can wait for the next scheduled maintenance
- **Provides fault code descriptions in simple terms**, including recommended solutions, saving you from unnecessary service visits
- **Provides real-time vehicle location data**, along with nearby dealerships, service centers and other points of interest

Advanced Remote Diagnostics Tools

OnCommand Connection Dashboard

Customizable web-based fleet management tool, which includes real-time location data, vehicle health and status, and much more

Fault Code Action Plans

Simple fault code descriptions, rating of fault severity and recommended actions to address the issue

Vehicle Health Reports

Detailed history and health information on every vehicle, including fault code history, engine status, fluid levels and more

Driver Behavior Monitoring*

Reports on driver behaviors that influence vehicle efficiency, including idle time, harsh braking and hard acceleration

Geofencing

Allows fleets to set up designated areas and track when vehicles enter/exit those zones

HEALTH REPORT

Getting Started is Easy!

- Sign up for your FREE 24-month telematics service subscription with your International[®] sales representative
- 2. Follow the instructions in your confirmation email to complete the OnCommand® Connection enrollment process
- 3. Use OnCommand Connection Advanced Remote Diagnostics to improve your fleet efficiency
