WHEN TO REPLACE SHOCK ABSORBERS:

If you're experiencing excessive bouncing after bumps, trailer sway, increased stopping distance, accelerated tire wear, or poor steering stability, your shock absorbers might need replacement.

MAINTENANCE AND TIPS:

- Inspect shocks during routine service intervals
- Check mounting hardware and bushings for wear or looseness
- Look for oil leakage or dents in the shock body
- Replace shocks in pairs to maintain balanced performance
- Inspect related suspension components such as springs and mounts when replacing shocks
