WHEN TO REPLACE COILED AIRLINES:

Coiled airlines should be replaced immediately if there are cracks, dry rot, or visible abrasions, air leaks/hissing sounds, stiff/brittle hoses that don't recoil, or loose, corroded, or leaking fittings.

MAINTENANCE AND TIPS:

- Inspect air lines during every pre-trip inspection for air leaks when charging the trailer system
- Keep lines properly supported - don't let them rub on catwalks or frame rails
- Avoid over-stretching by using the correct hose length
- Replace both lines together if one shows significant wear
